

## Care instructions for showers

*To maintain the water saving and rinsing properties, make sure the water- and air ducts are fully open!*

### *Cleaning*

ELLESS® shower strainers are lime repellent and therefore very easy to clean.

**Is the shower clogged?** Loosen the screw cover and the star squad. Put the strainer in vinegar for a couple of minutes up to an hour. Then reassemble and gently brush the strainer while letting the water flow. Also make sure that the air inlet is open.
